

# PROCORE<sup>®</sup>

THE QUIET DOOR<sup>®</sup>

## PROCORE<sup>®</sup>

ProCore<sup>®</sup> is available as an upgrade option with all our molded doors.

The solid core construction reduces sound transmission by up to 50 percent (compared to a hollow door) and withstands the dents and dings of daily life.

You select where privacy is preferred—most-common areas include home offices, bedrooms, playrooms and theater rooms.

### Construction

Solid core materials used inside the door affect the weight of the door, sound transmission, its ability to withstand impact and fire protection ratings.
